ROBINA GOES GREEN IN MOTORSPORT

Robina Floors has partnered with the Atlanta Motorsports Park (AMP) to supply floor coverings for the new Clubhouse adjacent to the driving course. Atlanta Motorsports Park (AMP) is the first green Motorsports Park in the world and is being built just north of Atlanta, Georgia, neighboring Robina's U.S. headquarters.

Gunar Overbeck, V.P. Operations of Robina Floors, points out that "Since the 1960's the Robin Group has focused strongly on using sustainable resources in our floor coverings. We are proud to support the first green Motorsports Park in the world with our products and look forward to seeing the completed facility".

Robina will provide highly renewable floor coverings for the AMP project scheduled to be completed late 2010. Jeremy Porter AMP CEO says "I am excited to see Robina as a sponsor. Their products are the perfect fit for our project".

Robina Floors is a subsidiary of The Robin Group, a global family of diverse companies approaching five decades of operation. Robina Floors is headquartered just north of Atlanta, Georgia, at the focal center of the domestic flooring industry.
